## Slim Profile Single-Glaze Glass Fitting Cat Door

⚠ Installation only to be completed by professional glazier

1  
Measure the height (x) from the underside of the cats stomach to the floor.

2  
Mark height (x) on glass panel with tape or similar, and cut required hole out above.

3  
Install exterior frame into hole and slide interior frame over top to required fit.

4  
Ensure door is level and secure using the 3 enclosed screws and plastic caps

- Designed for single pane glass installations up to 10mm thick
- Can be installed in ranch sliders
- Fits cut out hole 245mm and 267mm (For new installations we suggest a cut out hole of 267mm to allow fitment of a magnetic door at a later date)
- Large flap 185mm (w) x 205mm (h)
- 4-way locking system
- Virtually unbreakable flap made of high impact Bayer Polycarbonate
- Stainless steel screws to prevent rust and staining
- Self-lining frame to prevent dirt entrapment
- Strong NdFeb magnet provides self-locating flap and holds flap closed against strong winds
- Silicone coated brush seal to prevent draughts
- 3 year warranty
- Available in clear and white
